

December 14,2020

All Customers

This is an End of Life (EOL) product notice for the Enlighted custom-built product, Fixtureless Power Supply (**PWR-NF**).

Two new products are now available:

1. [DALI Power Supply Unit \(DALI-PSU-4-200\), Fixture Mount Form Factor](#)

The DALI-PSU-4-200 replaces the Enlighted Fixtureless Power Supply (PWR-NF). The DALI-PSU-4-200, formerly labeled as PWR-200mA-DALI, is renamed to align with the manufacturer's part number, eliminating confusion in the field and allowing customers to match packing slips to the products easily.

2. [DALI Power Supply Unit \(DALI-PSU-6-200\), Nipple Mount Form Factor](#)

The DALI-PSU-6-200 is the Nipple Mount version, with similar spec sheets and functionality.

The DALI-PSU-4-200 and DALI-PSU-6-200 are the preferred solution over the BZ-50 (competitors' product) previously suggested. When DALI PSU is used, the maximum number of supported sensors will drop from 20 to 15 for these new products. Refer to the following wiring diagram in the Support Portal.

1. [SU-5E, 2-wire, Sensor Grid with DALI Power Supply \(03227-02\)](#)
2. [SU-5 and CU-4E with BZ-50 Power Packs \(03191-01\)](#)
